

Cost neutral computer recycling and IT disposal

If your company is looking for a hassle free, cost neutral and fully compliant computer recycling and IT disposal service, then look no further than ShP.

Unlike many providers who often incur fees for computer and IT disposal services, we do not charge a penny. Our aim is to provide a hassle free collection service that helps your business comply with European Waste Electrical and Electronic Equipment (WEEE) disposal obligations.

Four good reasons to choose ShP for your computer recycling and IT disposal:

1 Free UK wide collection service

We aim to collect and recover all computer and IT hardware including laptops, PCs and supporting peripherals like keyboards, mice and TFT monitors from any UK location.

2 Complementary data wipe

Every item that we recover which has electronic data storage will receive a free blanco data wiping service worth £29.99. blanco is the world leader in data erasure software - approved by the UK Ministry of Defence for erasing hard drives.

3 Authorised accreditations

ShP Limited is one of few UK WEEE recycling providers to merit multiple ISO accreditations for Quality (ISO9001), Environment (ISO14001) and Security Management (ISO27001). We are also an authorised approved treatment facility (AATF) and hold numerous waste carrier licenses awarded by the Environment Agency. We've got environmental services and security covered!

4 Comprehensive WEEE reporting

Whether you are a producer, distributor or user of WEEE products including computers and laptops, you must comply with your duty of care. ShP will help you meet all your obligations and provide you with comprehensive reporting once your computer recycling and hard drive data wipe is complete.
